

MUHAMMAD ZULQARNAIN LONE

FA24-BCS-088

Task: Build a single-page personal CV/résumé as a static HTML + CSS website — no JavaScript, no framework, just semantic HTML5 and hand-written CSS. This is where you prove you actually know the raw building blocks before anything is allowed to hide them from you.

Code

```
<!doctype html>
<html lang="en">
  <head>
    <meta charset="UTF-8" />
    <meta name="viewport" content="width=device-width, initial-scale=1.0" />
    <title>Muhammad Zulqarnain - CV</title>
    <link rel="stylesheet" href="styles.css" />
  </head>
  <body>
    <div class="cv-box">
      <header>
        
        <h1>Muhammad Zulqarnain</h1>

        <p class="job">Computer Scientist</p>
        <p id="contact">
          <a href="mailto:zulqarnain@123.com">zulqarnain@123.com</a> | +92 300
            1234567 | Lahore, Pakistan
        </p>
        <nav>
          <a
            href="https://github.com/fa24-bcs-088/web-technologies"
            target="_blank"
          >GitHub Portfolio</a>
        </nav>
      </header>
      <hr />

      <main>
        <!-- Projects Section -->
        <section class="cv-section">
          <h2 class="section-title">Projects</h2>
          <ul class="projects-list">
            <li>
              <span>Hotel Management System |</span>
              <span class="technologies">C++, Qt</span> <br />
              Designed and developed a comprehensive desktop system to
automate
              hotel room bookings, check-ins, check-outs, and billing
              calculations. <br />
              Implemented structured data models, clean user menus, and robust
              file handling mechanisms to persistently store guest and room
              records.
            </li>
          </ul>
        </section>
      </main>
    </div>
  </body>
</html>
```

```

    </li>
    <li>
      <span>Android Fitness App |</span>
      <span class="technologies">Java, Android studio</span> <br />
      Developed a native Android application aimed at tracking daily
      physical activities, workouts, and health metrics. Utilized OOP
      pillars (Inheritance, Polymorphism, and Encapsulation) to design
      modular, maintainable UI components and backend business logic.
    </li>
    <li>
      <span>Grocery Store Database System |</span>
      <span class="technologies">SQL, MS SQL Server</span> <br />
      Built a fully normalized relational database schema to maintain
      high-integrity records for store inventory, sales, suppliers,
      and
      employee payroll. Authored optimized SQL queries, stored
      procedures, triggers, and indices to enforce transactional
      safety
      and speed up complex business analytics reports
    </li>
  </ul>

<!-- About Me Section -->
<section class="cv-section">
  <h2 class="section-title">About Me</h2>
  <p>
    Focused 5th-semester Computer Science student at COMSATS
    University
    Lahore with a strong academic foundation in core computer science
    disciplines, software engineering methodologies, and intelligent
    systems design. Highly proficient in C++, Python, and Java, with
    practical experience designing and implementing desktop, mobile,
    and
    relational database management applications from the ground up.
    Proven capability in translating complex data models and
    algorithmic
    workflows into high-quality, production-ready source code.
  </p>
